

Business Radio Solutions

European Edition

A COMPREHENSIVE RANGE OF BUSINESS RADIO SOLUTIONS THAT MEET YOUR NEEDS FLEXIBLY

No matter what your communication needs may be, we have the system for you. We go beyond the traditional VHF and UHF two-way radios providing peace of mind and keep you connected anywhere and at anytime. ICOM continues developing innovative solutions in response to diversifying user needs and can now offer a wide range of two-way radio platforms from analogue, digital, wireless LAN, LTE to satellite as a true comprehensive wireless communications company.

Satellite PTT

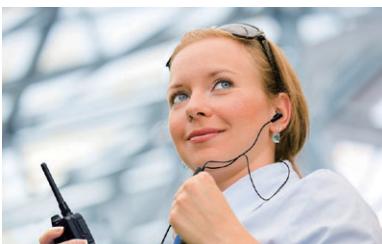

Satellite PTT (Push-To-Talk) is a two-way radio system that uses the Iridium® satellite network. It can be used as a communication tool in remote, isolated areas where there are no mobile phones or landline network infrastructure. Even if terrestrial network infrastructure is rendered unusable by human or natural disasters, Satellite PTT can provide a stable back-up, independent from other networks.

LTE Radio

Icom's LTE radio system provides instantaneous, wide area communication using an LTE (4G) and 3G network*. It doesn't require its own repeaters or IP network, therefore reducing the cost of building, and maintaining a wide area radio network. It enables full-duplex communication, which allows telephone style conversations as well as various types of calls such as individual, group and all call just like a traditional two-way radio, too.

* Service availability depends on the country. Network coverage provided by a custom SIM card.

WLAN Radio

Wireless LAN radio requires no licence to use and allows you to have several simultaneous full-duplex communications over a WLAN network. It offers secure communications with encryption and different types of calls such as individual, all, area, priority, group, conferences, status calls and short data messaging. You can also connect an IP phone or conventional radio equipment when using it with the RoIP gateway.

Digital Radio

IDAS™ is Icom's digital land mobile radio system using the NXDN™ or dPMR™ common air interface. IDAS™ offers a complete system of handheld radios, mobile radios, repeaters, network interface/trunking controllers, remote communicator, system manager software and various accessories. IDAS™ is a proven total digital solution that system owners or operators can grow into as their time and budgets allow.

Analogue Radio

Radio technologies and know-how cultivated for over 50 years have been applied to professional analogue radio products. Rugged, waterproof, easy to use, clear and powerful audio in a compact design, Icom's analogue products provide high performance and reliable communication. They are cost effective solutions that you can rely on and help you improve productivity and efficiency.

RoIP Gateway

The VE-PG4, a versatile Radio over IP Gateway provides a seamless solution interconnecting various communication systems irrespective of standards and distance such as satellite PTT radio, LTE radio, WLAN radio, IDAS digital radio, analogue radio, IP phone and more. The VE-PG4 works as general IP backbone converting received audio to transmit from other radio.

Licence-Free Radio

PMR446 licence-free radios can be used to improve your business or to just keep in touch with family and friends. There are no subscription charges or licence applications, PMR446 radios are ready to use right out of the box. Icom introduced the first digital licence-free dPMR446 radio in the industry. Digital offers higher audio clarity and security.

Satellite PTT Radio

Real-Time Communications Across the Globe

- One-to-many communications
- Total global coverage, including the poles*¹
- Real-time, low-latency communication with the Iridium® LEO (Low Earth Orbit) satellite network
- Emergency key on the top panel
- IP67 dust-tight and submersible protection
- 1500 mW of powerful audio
- 14.5 hours of long lasting battery life*²
- Private conversations with AES 256-bit encryption
- Interoperability with conventional radios and IP phones through the optional VE-PG4, RoIP gateway*³
- Short Data Message
- Voice Recording function
- Multiple language display (English, Chinese, French, Japanese, and Spanish)
- Built-in Bluetooth® capability
- Integrated GPS receiver shows a caller's position information on the display
- SMA type antenna connector
- AquaQuake™ function clears any water ingress that may penetrate the speaker grill of the radio
- USB charging (USB Micro-B type) and charging with a supplied rapid charger available
- Dimensions*⁴ (W × H × D): 57.8 × 135 × 32.8 mm
- Weight (approximate): 360 g (with BP-300, FA-S102U)

*¹ A subscription contract is required for using the IC-SAT100. Depending on the country or region, carrying and/or use of the IC-SAT100 may be prohibited.

*² TX : RX : standby = 5 : 5 : 90.

*³ Optional connection cable (OPC-2412) is required to connect to the VE-PG4.

*⁴ Projections are not included.

Docking Station (Optional accessories)

For in-vehicle and in-building applications

The image below is showing a connection example with,

- IC-SAT100
- BC-247 Charging cradle
- AH-40 Satellite antenna
- HM-222 Speaker-microphone

The product image shown above is for illustration purpose only. Actual product may vary.

Instant Wide Area Coverage Over an LTE (4G) and 3G Network

Full-Duplex Communication

Our LTE Radios provide full-duplex conversation, which allow users to talk and receive at the same time. This allows smooth, telephone-like conversations.

Multiple-user Communication

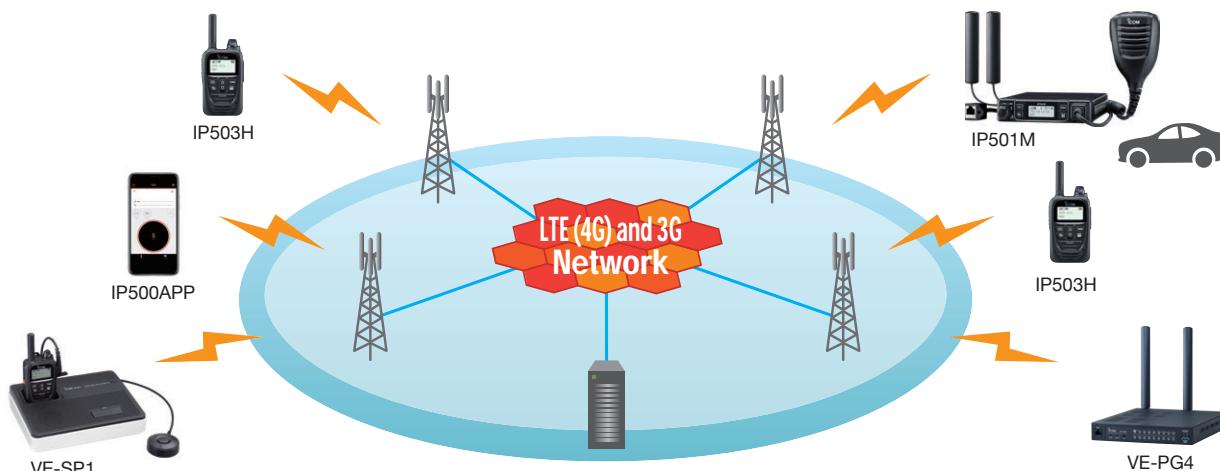

Multiple users in the call groups can initiate calls instantaneously. This removes the need to wait for available channels to communicate.

One-to-many Communication

Unlike mobile cell phones, IP503H/IP501M users can immediately start talking to all the radios in the same talkgroup, with just a push of a (PTT) transmit button.

Priority Interrupt Calling

Our LTE radio supports group calls with three or more people. In case of an emergency, you can break into an on-going call to transmit an important message.

IP503H

Compact and Durable LTE Handheld

- 900 mW loud and high quality audio with wideband, near lossless G.726 vocoder
- IP67 waterproof and dust-tight
- Emergency Call, Lone Worker and Man Down functions
- Voice Record/Playback functions
- Vibration Alert function notifies of incoming calls
- Built-in Bluetooth® capability and GPS
- Full-Duplex communication
- 17 hours battery life (with BP-272)
- Provisioning/FOTA (Firmware Over-the-Air)

IP501M

Mobile LTE Radio Interoperable with the IP503H

- Built-in Bluetooth® capability and GPS
- Text message reception and preprogrammed message transmission
- An Ethernet port for data communication (The optional VE-PG4 is required.)
- Emergency call and Lone Worker functions
- Noise Cancelling function (TX only)
- IP54
- D-SUB 25-PIN connector with the optional OPC-2407 cable for interfacing other devices and various controls
- Both 12 and 24 volt compatible
- Provisioning/FOTA (Firmware Over-the-Air)

Full-Duplex communication that works over a wireless IP Network

Wireless Communication System

By deploying access points across an existing IP network, the WLAN radio system allows you to communicate from anywhere in a facility. The IP100H can access the nearest access point, and roam between access points.

Individual, Group,

All or Area Communication

Staff spread across multiple rooms can communicate seamlessly. The IP communication terminal can receive short data messages with a vibration alert from a PC installed with IP100FS.

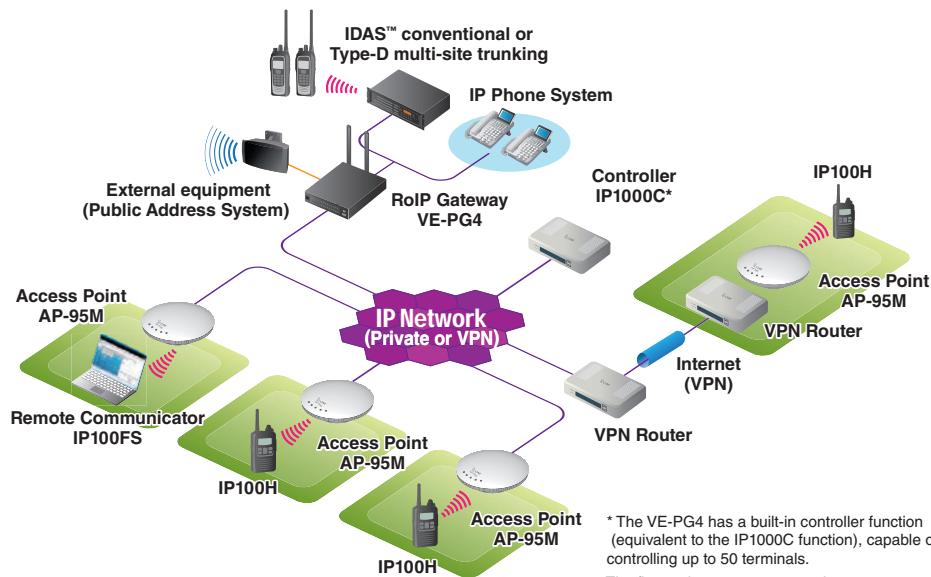

Interconnect between IDAS™ and IP Phone Systems

With the VE-PG4 RoIP gateway, the WLAN radio system can interconnect with an IP phone system, analogue radio and IDAS™ conventional and Type-D multi-site trunking system.

Hands-free, Full-duplex Communication

With an optional earphone-microphone or headset*, the IP100H user can simultaneously talk and receive like a phone. Hands-free operation allows your staff to carry out other tasks at the same time.

* For full-duplex operation, please use either HM-153LS, HM-166LS or HS-102 with OPC-2359.

* The VE-PG4 has a built-in controller function (equivalent to the IP1000C function), capable of controlling up to 50 terminals.

The figures leave out some equipment, such as a network switch, to simplify the information.

IP100H

Compact and Professional Grade IP Communication Terminal

- Licence-free wireless LAN communication terminal using IEEE 802.11 a/b/g/n standards (2.4 GHz and 5 GHz*)
- WPA-PSK/WPA2-PSK (TKIP/AES) authentication
- IPX7
- Vibration alert function announces incoming calls
- Text message reception and pre-programmed message transmission
- Status messages
- Emergency call function
- 20 hours battery life (with BP-271)
- Provisioning/FOTA (Firmware Over-the-Air)

* Authorized frequency range and channels may differ depending on the country.

AP-95M

Wireless LAN Access Point

- IEEE 802.11 a/b/g/n/ac compliant*
- PoE (Power over Ethernet) capability
- Optional RS-AP3, Access point management software

* Authorized frequency range and channels may differ depending on the country.

IP100FS

Remote Communicator

- Obtain location information of each IP100H
- Can be installed on a Windows®-based tablet PC as well as laptop PC

IP1000C

Controller

- The IP1000C controls all terminal configurations over the air
- Capable of controlling up to 100 terminals (including IP100FS)

IDAS™ Digital Radios

Flexible Digital Migration Solutions with Advanced IP Network Integration

Multiple-site Configurations

IDAS™ systems provide various digital radio solutions from simple peer to peer operation between two radios, up to multi-site wide area networks. Further coverage is enhanced with IP interconnection.

Digital Clarity

By adopting the industry standard AMBE+2™ Vocoder and advanced FEC (Forward Error Correction) coding, IDAS™ systems provide improved communication quality, clarity and reliability.

Effective System Management

Simple and efficient management is critical for systems of any size. IDAS™ provides effective system management with such features as OTAP and administration applications.

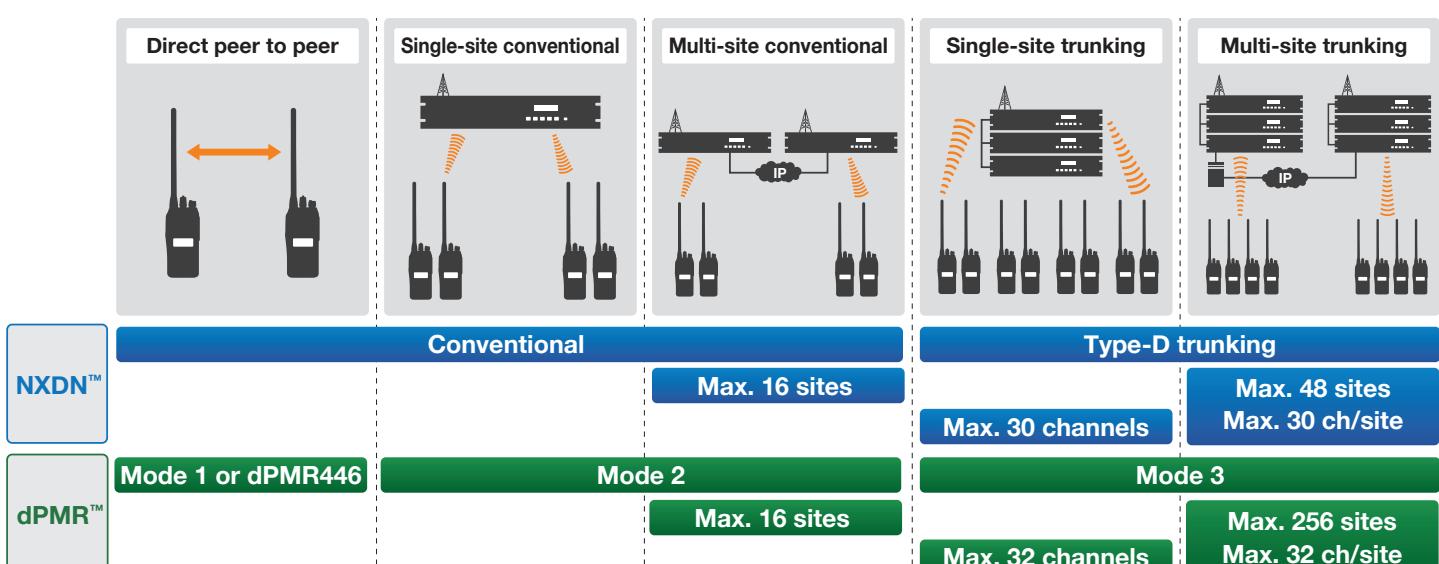

NXDN™/dPMR™ Protocol Choice

The IDAS™ digital radio system has two protocol choices, NXDN™ or dPMR™. Both protocols are open digital radio standards using 6.25 kHz FDMA narrowband technology. With this flexible choice, the IDAS™ radio system allows for interoperability with other manufacturers equipment to add to/replace existing NXDN™ and/or dPMR™ systems.

System Scalability According to Communication Traffic and Coverage

Depending on the communication traffic and coverage, an IDAS™ radio system can be expanded from single site conventional to multi-site trunking, to match your communication needs.

IDAS™ Handheld Radios

IC-F3400D/F4400D Series

IDAS™ Takes You to a New Level of “Smart”

- 1024 channels (32 channels for IC-F3400D/DP/F4400D/DP) • IP68 • Colour display
- Integrated GPS • Bluetooth® capability • microSD card slot • Voice recording • OTAP • OAA
- USB connector • Active noise canceller • AES/DES encryption
- 10 hours battery life (with BP-283) • Motion/Stationary sensor • Man down/Lone worker
- Vibration alert • Channel announcement • 1300 mW loud audio

NXDN™

Conventional

Single/Multi-Site Trunking (Optional)

dPMR™

Mode 1

Mode 2

Mode 3 (Optional)

IC-F3262D/F4262D Series

Advanced Digital Radio with Built-in GPS Receiver*

- 512 channels • IP67 • Large multi-function full dot matrix display • Integrated GPS*
- 10.5 hours battery life (with BP-232WP) • Man down*/Lone worker
- Status and short data message (SDM) • Remote monitor/Ambience listening

*Depending on the version.

NXDN™

Conventional

Single/Multi-Site Trunking

dPMR™

Digital Repeater / Controller / System Management

IC-FR5100/FR6100

Digital and Analogue, Dual Mode Repeater

- Digital conventional mode and analogue FM with auto selection
- 25 W at 100% duty cycle operation (Ambient temperature: 25°C)
- Optional network controllers for multi-site conventional or trunking system configuration
- “Two channels in one box” configuration with optional UR-FR5100/UR-FR6100
- 32 memory channels capacity
- 2U height rack mount design

NXDN™

dPMR™

IC-FC5000E

dPMR™ Mode 3 Trunking Controller

- Spectrum efficient centralized control channel trunking
- Up to 32 channels per site (One control channel, up to 31 traffic channels)
- Up to 32 site multi-site trunking with CS-FC5000SCS system control software
- Up to 256 site multi-region connection
- Call queuing and emergency call with pre-emption
- Repeater anomaly detection and alert
- A traffic channel can be configured as a secondary control channel
- 1U (44 mm) rack mount

dPMR™

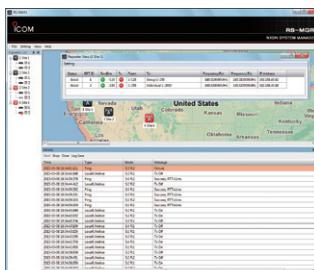

RC-FS10

Virtual Radio/PC Dispatch

- PC remote communicator for IDAS™ conventional, NXDN™ Type-D multi-site trunking and analogue radio systems (VE-PG4 is required for analogue radio systems.)
- Up to eight different IDAS and analogue radio systems can be programmed
- Up to 40 programmable buttons.
- Short data message, status and DTMF can be sent
- Caller ID, called ID, name and call type information are displayed
- Optional HM-152 or SM-26 microphone

NXDN™

dPMR™

RS-MGR1

Enhance System Management for NXDN™ Type-D Trunking Systems

- Provides real-time monitoring, system alerts and log search functions
- Repeater properties show condition summary, system information, interface (traffic statistics), repeater condition details and ping status of each repeater
- Registration log, communication log, traffic log and search log can be searched and downloaded with extensive filter settings

NXDN™

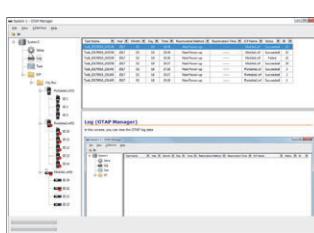

RS-MGR2

Enhance System Management for dPMR™ Mode 3 Systems

- Provides real-time monitoring, system alerts and log search functions for a dPMR™ Mode 3 system
- Real-time monitoring includes repeater view, repeater status, repeater condition, active screen and system connection
- Registration log, communication log, traffic log and search log can be searched and downloaded with extensive filter settings

dPMR™

CS-OTPM1

Easily Reconfigure Radios with Over-The-Air Programming

- Remotely reconfigure radios while in the field
- Radios can be reconfigured in a short period of time by transmitting only the updates
- Single programming data can transmit to a whole fleet with only one click
- Up to 10,000 sessions are logged for review and rescheduling
- Manages up to 100,000 radios

NXDN™

dPMR™

Analogue Radios

IC-F1000/F2000 Series

Slim, Compact Dimensions with IP67 Waterproofing

- 128 channels (16 channels for the non-display model)
- Motion/Stationary sensor
- Man down/Lone worker
- 14 hours battery life (with BP-279)
- 1500 mW loud audio
- Channel announcement
- 16 codes inversion voice scrambler

IC-F51 ATEX/F61 ATEX

ATEX Intrinsically Safe Radio

- Compact design
- 128 channels
- IP67
- Lone worker function
- 16.5 hours battery life (with BP-227AXD)
- Built-in 2-Tone, 5-Tone, CTCSS and DTCS
- HM-138 Optional speaker-microphone

ATEX Certifications

Gas: II 2G Ex ib IIA T3 Gb
Dust: II 2D Ex tb IIIC T160°C Db IP67
(Tamb=-20°C to +55°C)

DO NOT use the transceiver with any other equipment not specified in the option list (Pages 16–20).
Please ask your dealer to ensure the ATEX and IECEEx ratings are acceptable for the intended place of use.

IC-F5022/F6022 IC-F5012/F6012

Hardworking Mobile Radios

- 2 models for display or non-display
- 128 channels (IC-F5022/F6022) or 8 channels (IC-F5012/F6012)
- Lone worker function
- 4 W (typical) front mounted speaker
- External device connection with optional ACC cable

Data Radios

IC-F5122DD/F6122DD

General Purpose Transparent Data Modem

- 9600 bps (at 12.5 kHz) and 4800 bps (at 6.25 kHz) data mode
- 25 W, 10 W and 6 W three-step RF output power
- TCP/IP protocol (IPv4) support for Ethernet
- Meets EN 300 113/EN 301 166 standards
- Fast data transfer using 4-level FSK modulation

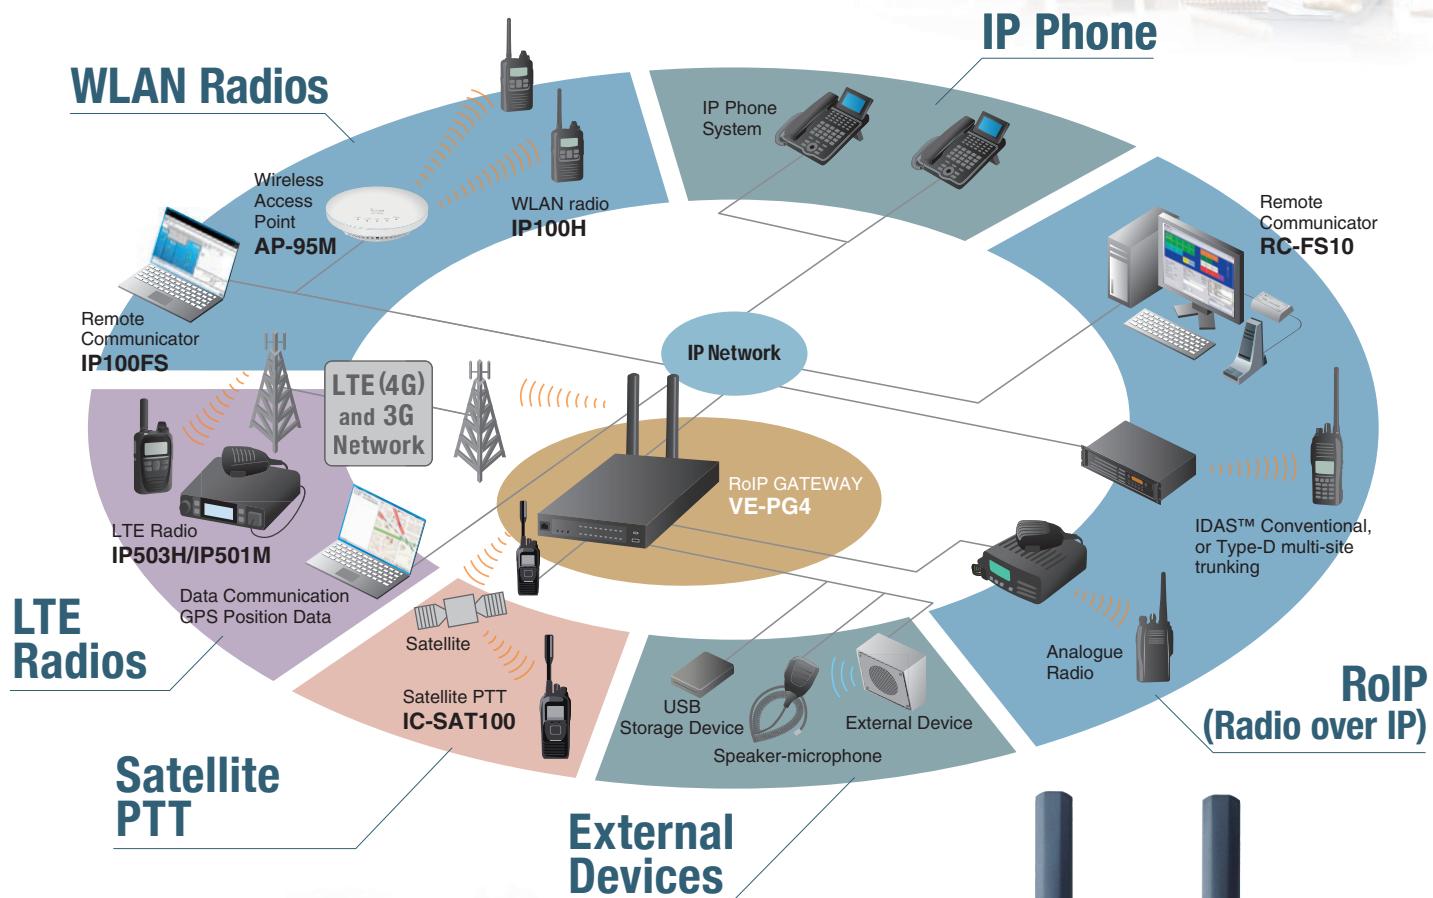

RoIP Gateway

Radio Gateway – Link LTE Radios to Digital/Analogue Radios, Satellite PTT Radio, WLAN Radio, IP Phone and More

The VE-PG4 is a versatile RoIP (Radio over IP network) gateway unit, which seamlessly interconnects various communication systems. The built-in LTE module* provides virtually nationwide communication coverage.

* Service availability depends on the country. Network coverage provided by a custom SIM card.

Communication Links

VE-PG4

Licence-Free Radios

IC-F29SDR Digital/Analogue

Professional Licence-Free Radio Suitable for Various Industry Sectors

- dPMR 446 (Digital) and PMR 446 (Analogue) in one radio
- Digital 32 channels, Analogue 16 channels
- Display and 4 programmable keys on the front
- Status message
- CTCSS, DTCS for analogue
- IP67
- 1500 mW loud audio
- Alert-Ring function for emergency situations
- 26 hours battery life (with BP-280)
- Channel announcement
- 11 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

IC-F29DR/F29DR2 Digital/Analogue

Professional Digital Licence-Free Radio

- dPMR 446 (Digital) and PMR 446 (Analogue) in one radio
- IC-F29DR2: Digital 32 channels, Analogue 16 channels
- IC-F29DR: Digital 16 channels, Analogue 8 channels
- CTCSS, DTCS for analogue
- IP67
- 26 hours battery life (with BP-280)
- Channel announcement
- 11 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

IC-F29SR/F29SR2 Analogue

Slim, Waterproof PMR 446 Licence-Free Radio

- PMR 446 (Analogue)
- IC-F29SR2: Analogue 16 channels
- IC-F29SR: Analogue 8 channels
- CTCSS, DTCS
- Built-in voice scrambler for private conversation
- IP67
- 21 hours battery life (with BP-279)
- 1500 mW loud audio
- Channel announcement
- 8 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

*¹ Upgrade licence(ISL-CHEX) required to enable 4000 channel capacity.

*² NXDN™ only

*³ With standard battery pack

*⁴ Conventional mode. 5.5:90 duty cycle, power save ON

*⁵ Inversion type voice scrambler is not compatible with UT-109R/UT-110R voice scrambler.

*⁶ PTT ID and emergency call

*⁷ PTT ID only

*⁸ Depending on the version.

*⁹ The non-display model beeps and its LED indicator blinks when receiving a message.

*¹⁰ RX only

*¹¹ Default factory setting (Protocol) differs, depending on the radio model.

*¹² Upgrade licence (ISL-CHEX) required to enable 4000 channel capacity.

*¹³ IP dust and water tests were performed on the controller and RMK-3 only.

*¹⁴ UX-241 antenna is required.

*¹⁵ D-SUB. Digital modulation input is not available even when using accessory cables.
