

Business Radio Solutions

European Edition

A FLEXIBLE RANGE OF RADIO SOLUTIONS THAT MEET YOUR BUSINESS NEEDS

Icom goes beyond traditional VHF and UHF two-way radios providing innovative solutions in response to diversifying user needs and can now offer a wide range of two-way radio platforms from analogue, digital, wireless LAN, IP to satellite as a true wireless communications and solutions company.

IP Radio & Hybrid IP Radio

Icom's IP radio system provides instantaneous, wide area communication using an LTE (4G) and 3G network*. It enables full-duplex communication, which allows telephone style conversations. The Hybrid IP radio can receive both communications from an LTE radio group and IDAS™ (or analogue) group.

* Service availability depends on the country. Network coverage provided by a custom SIM card.

Satellite PTT

Satellite PTT (Push-To-Talk) is a two-way radio system that uses the Iridium® satellite network. It can be used as a communication tool in remote, isolated areas where there are no mobile phones or landline network infrastructure. Even if terrestrial network infrastructure is rendered unusable by human or natural disasters, Satellite PTT can provide a stable back-up, independent from other networks.

WLAN Radio

Wireless LAN radio requires no licence to use and allows you to have several simultaneous full-duplex communications over a WLAN network. It offers secure communications with encryption and different types of calls such as individual, all, area, priority, group, conferences, status calls and short data messaging. You can also connect an IP phone or conventional radio equipment when using it with the RoIP gateway.

Digital Radio

IDAS™ is Icom's digital land mobile radio system using the NXDN™ or dPMR™ common air interface. IDAS™ offers a complete system of handheld radios, mobile radios, repeaters, network interface/trunking controllers, remote communicator, system manager software and various accessories. IDAS™ is a proven total digital solution that system owners or operators can grow into as their time and budgets allow.

Analogue Radio

Radio technologies and know-how cultivated for over 50 years have been applied to professional analogue radio products. Rugged, waterproof, easy to use, clear and powerful audio in a compact design, Icom's analogue products provide high performance and reliable communication. They are cost effective solutions that you can rely on and help you improve productivity and efficiency.

RoIP Gateway

The VE-PG4, a versatile Radio over IP Gateway provides a seamless solution interconnecting various communication systems irrespective of standards and distance such as satellite PTT radio, IP radio, WLAN radio, IDAS™ digital radio, analogue radio, IP phone and more. The VE-PG4 works as general IP backbone converting received audio to transmit from other radios/protocols.

Licence-Free Radio

PMR446 licence-free radios can be used to improve your business or to just keep in touch with family and friends. There are no subscription charges or licence applications, PMR446 radios are ready to use right out of the box. Icom introduced the first digital licence-free dPMR446 radio to the industry. Digital offers higher audio clarity and security.

IP Radios – Hybrid

Innovative IP Radios with Licensed Professional Radio Mode

The IP730D and IP740D are dual mode “Hybrid” radios that provide nationwide coverage over LTE networks and conventional VHF/UHF professional radio mode (IDAS™ digital/analogue mode.) It receives both communication modes and transmits either or both modes.

IP730D/IP740D

Hybrid Handheld IP Radio for Local & Nationwide Communications

- Simultaneous TalkListen™ in LTE Mode • 1500 mW of powerful audio*1
- IP67 waterproof and dust-tight • 24 hours of long lasting battery life*2
- Emergency Call, Lone Worker and Man Down functions • Digital Voice Recording/Playback
- Vibration alert function • Built-in Bluetooth® capability
- GPS Data Transmission capability in LTE mode • AquaQuake™

*1 At 10% audio distortion

*2 LTE Mode, TX : RX : standby = 5 : 5 : 90. The battery life may be shorter, depending on the distance with the cellular station or the signal strength. (Also see page 9 for IDAS™ features)

Dual Mode Operation with Main and Sub PTT Buttons

The IP730D series has a Sub PTT button, in addition to the Main PTT button. It provides smooth dual mode operation with independent PTT buttons for each LTE mode and IDAS™ mode.

HYBRID
LTE X IDAS

Talk Listen
Simultaneous

Check the Icom website for more information.

Expand an existing IDAS™ system with an LTE network

Communication redundancy, when network congestion occurs or network service is temporarily unavailable

Bridge Function*

The Bridge function* is an innovative feature that allows handheld radio users to achieve an audio bridge between the LTE mode and IDAS™ mode easily.

* When using the Bridge function, operating time will be shorter and output power of the radio is reduced to 1 W. The Bridge function may be prohibited in some countries. Please check the legal requirements in your country before using this function.

IDAS™ Group ↔ IP730D ↔ LTE Group

* Network coverage provided by a custom SIM card. Service availability depends on the country.

IP Radios – LTE

Wide Area Coverage Over an LTE (4G) and 3G Network*

Simultaneous TalkListen™

The Simultaneous TalkListen™ provides full-duplex one-to-many communication, which allows users to talk and receive at the same time. This results in a smooth, telephone-like conversations.

Exceptional Stability and Availability

The system server is placed within a secured closed network, and shielded from potential attacks. Its operation relies on a custom SIM that is isolated from the Internet, making it more reliable than regular PoC systems that use the Internet.

Multiple-user Communication

Multiple users in the call groups can initiate calls instantaneously. This removes the need to wait for available channels to communicate.

Priority Interrupt Calling

Our IP radios support group calls with three or more people. In case of an emergency, you can break into an on-going call to transmit an important message.

IP503H

Compact and Durable IP Handheld

- 900 mW loud high quality vocoder audio
- IP67 waterproof and dust-tight
- Emergency Call, Lone Worker and Man Down functions
- Voice Record/Playback functions
- Vibration Alert function notifies of incoming calls
- Built-in Bluetooth® capability and GPS
- Simultaneous TalkListen™
- 17 hours battery life (with BP-272)
- Provisioning/FOTA (Firmware Over-the-Air)

IP501M

Mobile IP Radio Interoperable with the IP503H

- Built-in Bluetooth® capability and GPS
- Preprogrammed message transmission and reception
- An Ethernet port for data communication (The optional VE-PG4 is required.)
- Emergency call and Lone Worker functions
- Noise Cancelling function (TX only)
- IP54
- D-SUB 25-PIN connector with the optional OPC-2407 cable for interfacing other devices and various controls
- Simultaneous TalkListen™
- Provisioning/FOTA (Firmware Over-the-Air)

VE-SP1

Conference Call Speaker

- Portable operation with eight LR6 (AA) cells
- Built-in loudspeaker and high sensitivity external microphone
- Charges the radio when using the AC adapter

* The IP radio is not supplied.

IP500APP

Android™/iOS™ Application to Communicate with IP Radios*

- Full-Duplex communication
- Short text message
- Voice Recording/Playback function
- Address book
- TX/RX history

* IP500APP for Android™: Android™ version 8.0 or later
 IP500APP for iOS™: iOS™ version 12 or later
 IP500APP service may not be available.

* Network coverage provided by a custom SIM card. Service availability depends on the country.

Real-Time Communications Across the Globe

SATELLITE PTT (Push-To-Talk) is a transceiver that uses the Iridium® satellite network. It can be used as a communication device in remote, isolated areas and the sea where there are no mobile phones or communications infrastructure. Even if the terrestrial network infrastructure is rendered unusable by human or natural disasters, SATELLITE PTT can provide a stable back-up, independent from other networks.

One-to-Many Communications

Unlike satellite phones, IC-SAT100/M users can immediately start talking to all the radios in the same talkgroup, with just a push of the transmit (PTT) button.

Total Global Coverage, including the Poles*¹

The Iridium® satellite network covers the entire globe including both poles, and can provide wide area global communications anywhere on the planet.

Real-Time, Low-Latency Communication

The satellite PTT radio uses Low Earth Orbit (LEO) Iridium® satellites, offering low-latency communication compared to Geosynchronous Equatorial Orbit (GEO) satellites, which orbit at an altitude approximately 50 times higher.

Conventional Radios and IP Phones Interconnection*²

With a VE-PG4 RoIP gateway, the IC-SAT100/M can interconnect with an IP phone system, IP, LTE, IDAS™ digital (dPMR™ mode 2, NXDN™ conventional, Simulcast and Type-D multi-site trunking) and analogue transceivers.

*¹ Subscription contracts are required for using the IC-SAT100/M. Depending on the country or region, carrying and/or use of the IC-SAT100/M may be prohibited.

*² Optional VE-PG4 RoIP gateway and OPC-2412 connection cable are required for the IC-SAT100. Optional VE-PG4 RoIP gateway and a LAN cable are required for the IC-SAT100M.

IC-SAT100 Compact Handheld

- IP67 waterproof and dust-tight
 - 1500 mW of powerful audio
 - 14.5 hours of long lasting battery life*
 - Emergency key on the top panel
 - Short Data Message
 - Voice Recording function
 - Built-in Bluetooth® capability
 - SMA type antenna connection
 - USB charging • Integrated GPS receiver
 - AES 256-bit encryption for security
 - Multiple language display
 - Compatible with Iridium Extreme PTT mode
- * TX : RX : standby = 5 : 5 : 90.

Docking Station for In-Vehicle Use

IC-SAT100M In-Building and In-Vehicle Use

- As the RF unit is housed in the antenna unit, wiring between the antenna and main unit can be done flexibly using a LAN cable (Cat 5e)*1
- For a vehicle use, optional AH-40 must be used for optimal performance and environmental resilience
- Power supply requirement: 13.2 V/26.4 V DC
- Antenna unit with RF unit: IP67, Main unit: IP54, Microphone: IP55 • 1500 mW audio output
- Voice Recording function • Short Data Message
- Built-in Bluetooth® capability
- Integrated GPS receiver • AES 256-bit encryption
- Multiple language display (English, Chinese, French, Japanese, and Spanish)
- Compatible with Iridium Extreme PTT mode

*1 User supplied LAN cable is required to replace the supplied 20 m LAN cable. Maximum 100 m.

Antenna unit

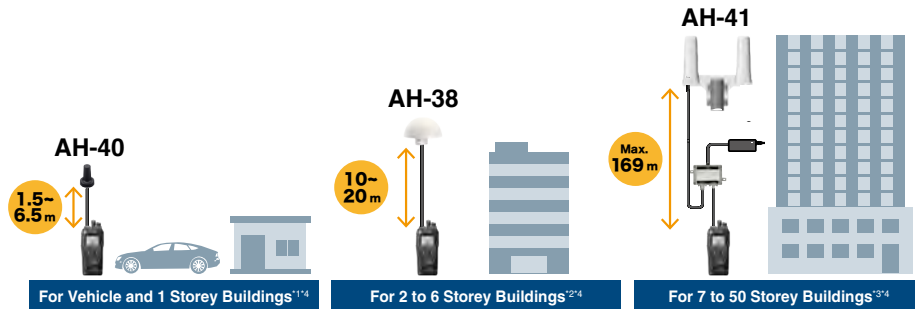

Microphone ▶

◀ Main unit

Types of External Antennas for IC-SAT100

By replacing the IC-SAT100 antenna with an external antenna, satellite communication is possible even from a vehicle or building. Select the most suitable antenna according to the installation location and application. Due to the built-in amplifier in the AH-41, it can be possible to extend the reach of coaxial cables over longer distances.

IC-SAT100M In-building Use

You can flexibly install the IC-SAT100M and the antenna unit (with RF unit) with only a LAN cable (Maximum 100 m).^{*5}

*1 Optional OPC-2422 coaxial cable (5 m) is required for more than 1.5 m extension.
 *2 Optional OPC-2113 or user supplied coaxial cable is separately required. Cable loss requirement is less than 3.4 dB loss at 1621 MHz.
 *3 Optional OPC-2462 or user supplied coaxial cable is separately required. Cable loss requirement is 12.5 - 13.0 dB loss at 1621 MHz.
 *4 The distance from the main unit to the antenna is a rough guideline.
 The height of the building is an estimate assuming that the height of one floor is 3.5 m.
 *5 User supplied LAN cable is required to replace the supplied 20 m LAN cable.

Check the Icom website for more information.

IDAS™ Digital Radios

Flexible Analogue And Digital Solutions with Advanced IP Network Integration

User-Friendly Digital System That is Simple Yet Powerful

IDAS™ systems provide various digital radio solutions from simple peer to peer operation between two radios, up to multi-site wide area networks. Further coverage is enhanced with IP interconnection.

Crystal-Clear Digital Audio Outshines Analogue Audio

By adopting the industry standard AMBE+2™ Vocoder and advanced FEC (Forward Error Correction) coding, the IDAS™ system provides improved communication quality, that is clearer than analogue radio systems.

Simplified Control for Ease of System Management

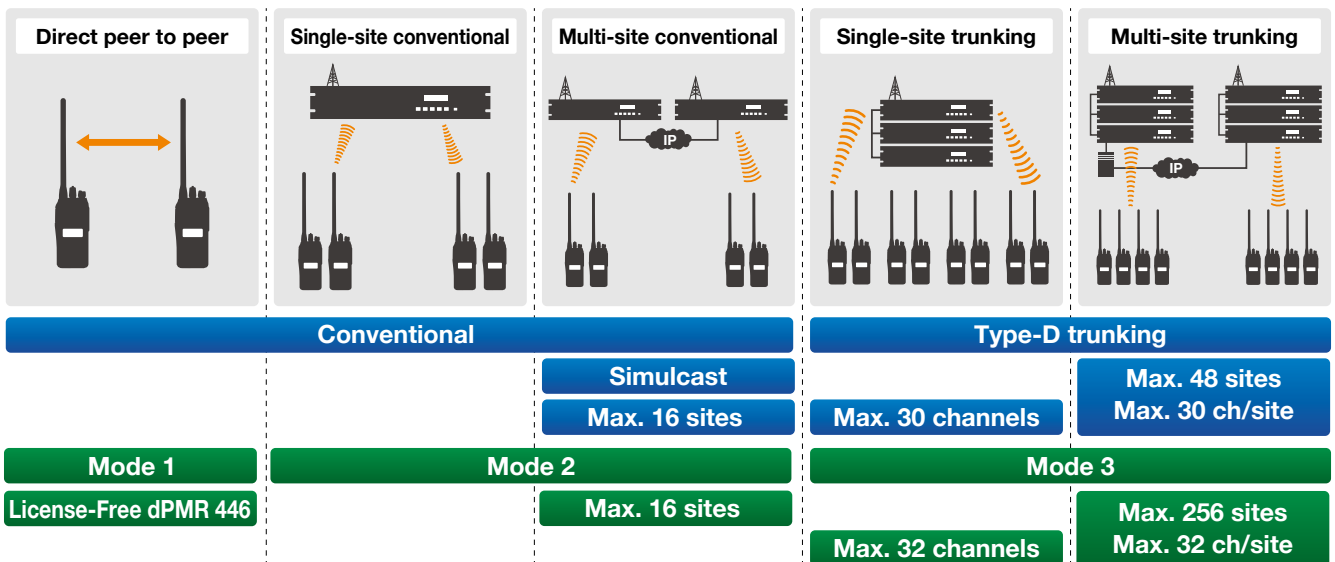

Simple and efficient management is critical for systems of any size. IDAS™ provides simplified control for ease of system management with such features as OTAP and administration applications.

NXDN™/dPMR™ Protocol Choice

The IDAS™ digital radio system has two protocol choices, NXDN™ or dPMR™. Both protocols are open digital radio standards using 6.25 kHz FDMA narrowband technology. With this flexible choice, the IDAS™ radio system allows for interoperability with other manufacturers equipment to add to/replace existing NXDN™ and/or dPMR™ systems. Some models support NXDN™ 12.5 kHz mode for compatibility with other manufacturers.

System Scalability According to Communication Traffic and Coverage

Depending on the communication traffic and coverage, an IDAS™ radio system can be expanded from single site conventional to simulcast conventional or multi-site trunking, to meet changing communication system requirement. One notable feature is that you don't have to use your own microwave or similar equipment because the requirement for the IP line in the backbone is flexible.

IDAS™ Simulcast System

Wide Area Coverage on a Single Pair of Frequencies

The IDAS™ Simulcast (NXDN™ protocol) system links multiple repeater sites* through an IP network, synchronizing them with precise GPS signals. This enables a single pair of frequency licenses to cover a wider area. Even in urban areas where obtaining new frequency licenses is difficult, it's feasible to establish a multi-site, wide-area system, keeping license costs lower. In certain situations, only the IDAS Simulcast system can fulfill specific requirements. * The maximum number of sites for an IDAS™ Simulcast system is 32.

Ideal 6.25 kHz FDMA Technology for Simulcast

The IDAS™ Simulcast system transmits digital voice and data at 4800 bps using 4-Level FSK and 6.25 kHz very narrow bandwidth FDMA technology. With a symbol duration of about 420 microseconds (μ s), the system experiences minimal Inter-Symbol Interference (ISI).

Consequently, the IDAS Simulcast system boasts a delay spread tolerance of approximately 60 μ s. In contrast, a DMR/P25 Phase 1 system has a delay spread tolerance of about 30 μ s, leading to a reduction in coverage radius by a similar amount.

Simplified Setup and Flexible Adjustments

Compared to other simulcast systems, IDAS™ Simulcast can initially start with a more straightforward setup. If issues arise, adjustments to the overlap and range between repeaters can be made later on.

Any IDAS™ Radio Can Be Employed

No extra technical requirements are needed on the IDAS™ transceiver to utilize IDAS™ Simulcast. The transceiver can receive simulcast through the same process used for handling received multipath interference. Therefore, any IDAS™ transceiver can be employed for IDAS™ simulcast.

IDAS™ Handheld Radios

IC-F3400D/F4400D Series

Flagship Excellence with Colour Display and Versatile Features

- 1024 channels • IP68 • Colour display • Integrated GPS
- Bluetooth® capability • microSD card slot • Voice recording • OTAP • OAA
- USB connector • Active noise canceller • AES/DES encryption*
- 10 hours battery life (with BP-303) • Motion/Stationary sensor • Man down/Lone worker
- Vibration alert • Channel announcement • 1300 mW loud audio

* Licence key upgrade required

IP730D/IP740D

IDAS™ and LTE Hybrid for Local & Nationwide Communications

- 128 channels/8 zones • Rotary encoder
 - DTMF code transmission with optional DTMF microphone, HM-245T
 - OTAP function • Up to 500 ID numbers for IDAS™ mode
 - Individual, Group and All calls • Talk back • CTCSS and DTCS for analogue mode
- (Also see page 3 for Hybrid features)

IC-F52D/F62D

Powerful and Compact, 5 W Model with Advanced Features

- 512 channels • IP67 • Full dot matrix display for 14 characters with status icons
- Bluetooth® capability • Voice recording • OTAP • OAA • Active noise canceller
- 18.5 hours battery life (with BP-294) • Motion/Stationary sensor • Man down/Lone worker
- Vibration alert • Channel announcement • 1300 mW loud audio

* Licence key upgrade required

IC-F1100D/F2100D Series

Budget-Friendly Handheld with/without Keypad and LCD Variations

- 128 channels (16 channels for IC-F1100D/F2100D) • IP67 • Motion/Stationary sensor
- Man down/Lone worker • 18 hours battery life (with BP-280) • 1500 mW loud audio • OAA
- Channel announcement

IDAS™ Mobile Radios

IC-F5400D/F6400D

Flagship Excellence with Versatile Configuration and Colour Display

- 1024 channels • Flexible configurations with detachable front panel • IP55
- Colour display • Integrated GPS • Bluetooth® capability • microSD card slot
- Voice recording • OTAP • OAA • USB connector • Active noise canceller
- AES/DES encryption • Lone worker • Channel announcement

NXDN™	Conventional	Single/Multi-Site Trunking (Optional)	
dPMR™	Mode 1	Mode 2	Mode 3 (Optional)

IC-F5330D/IC-F6330D

CommandMic™ Remote Control with Ethernet Cable Connection

- 128 channels • NXDN™ Type-D single-site trunking • Flexible Power over Ethernet (PoE) connection*1 between RF unit and CommandMic™ • High contrast, wide viewing angle, black background display • Bluetooth® capability*2 • Emergency and Lone Worker functions
- Remote monitor • Status and short data message (SDM) • Optional D-SUB connector cable
- Power ON/OFF (Stand-by) from the CommandMic™ • GPS receiver connection with optional ACC cable

*1 Up to 100 m Ethernet cable *2 Depending on version

NXDN™	Conventional	Single-Site Trunking
-------	--------------	----------------------

IC-F5130D/F6130D

Digital Standard Mobile Transceiver

- 128 channels • NXDN™ Type-D single-site trunking • High contrast, wide viewing angle, black background display • Emergency and Lone Worker functions
- Integration with the VE-PG4 • Status and short data message (SDM) • Optional D-SUB connector cable • GPS receiver connection with optional ACC cable
- Bluetooth® capability with optional UT-137A

NXDN™	Conventional	Single-Site Trunking
-------	--------------	----------------------

IC-FR5300/FR6300

Compatible with Analogue and IDAS™ ALL Modes Including Simulcast

- Digital conventional mode and analogue FM with auto selection • 25 W at 100% duty cycle operation (Ambient temperature: 25°C) • Compatible with digital simulcast system with the optional UC-FR5300 #14 network controller and GPS antenna • Multi-site conventional or trunking system configuration • “Two channels in one box” configuration with optional UR-FR5300/UR-FR6300

NXDN™

For dPMR™ protocol mode operation, use the IC-FR5100/FR6100 repeater.

IC-FC5000E

IDAS™ dPMR™ Mode 3 Trunking Controller

- Spectrum efficient centralized control channel trunking • Up to 32 channels per site (One control channel, up to 31 traffic channels) • Up to 32 site multi-site trunking with CS-FC5000SCS system control software • Up to 256 site multi-region connection • Call queuing and emergency call with pre-emption • Repeater anomaly detection and alert • A traffic channel can be configured as a secondary control channel • 1U (44 mm) rack mount

dPMR™

Use with the IC-FR5100/FR6100 repeater and UC-FR5000SE Ethernet board.

RC-FS10

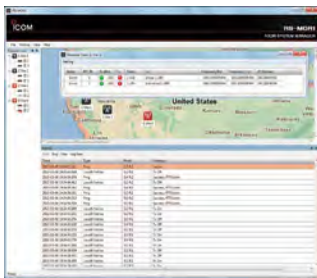

Virtual Radio/PC Dispatch

- PC remote communicator for dPMR™ mode 2, NXDN™ conventional, Type-D multi-site trunking and analogue radio systems (VE-PG4 is required for analogue radio systems.)
- Up to eight different IDAS™ and analogue radio systems can be programmed • Up to 40 programmable buttons. Short data message, status and DTMF can be sent • Caller ID, called ID, name and call type information are displayed • Optional HM-152 or SM-26 microphone

NXDN™

dPMR™

RS-MGR1

Enhance System Management for NXDN™ Type-D Trunking Systems

- Provides real-time monitoring, system alerts and log search functions • Repeater properties show condition summary, system information, interface (traffic statistics), repeater condition details and ping status of each repeater • Registration log, communication log, traffic log and search log can be searched and downloaded with extensive filter settings

NXDN™

RS-MGR2

Enhance System Management for dPMR™ Mode 3 Systems

- Provides real-time monitoring, system alerts and log search functions for a dPMR™ Mode 3 system • Real-time monitoring includes repeater view, repeater status, repeater condition, active screen and system connection • Registration log, communication log, traffic log and search log can be searched and downloaded with extensive filter settings

dPMR™

CS-OTPM1

Easily Reconfigure Radios with Over-The-Air Programming

- Remotely reconfigure radios while in the field • Radios can be reconfigured in a short period of time by transmitting only the updates • Single programming data can be shared with a whole fleet with only one click • Up to 10,000 sessions are logged for review and rescheduling
- Manages up to 100,000 radios

NXDN™

dPMR™

For IC-F3400D, IC-F52D and IC-F5400D series.

Analogue Radios

IC-F1000/F2000 Series

Big Sound, Small Package! Unmatched 1500 mW Audio and Features

- 128 channels (16 channels for the non-display model) • Motion/Stationary sensor
- Man down/Lone worker • 20 hours battery life (with BP-280) • 1500 mW loud audio
- Channel announcement • 16 code inversion voice scrambler

IC-F3002/F4002

5 W Output Power Also in UHF, 1500 mW Loud Audio

- 16 channels • Lone worker function • 5 W output power both in VHF and UHF
- 1500 mW loud audio • 31 hours battery life (with BP-299) • Built-in 2-Tone, 5-Tone, CTCSS and DTCS • BIIS 1200 PTT ID transmission • MDC 1200 PTT ID and emergency

IC-F5022/F6022 IC-F5012/F6012

Affordable Analogue Mobile Radios with Advanced Features

- 2 models for display or non-display • 128 channels with display (IC-F5022/F6022) or 8 channels with LED (IC-F5012/F6012) • Lone worker function • 4 W (typical) front mounted speaker • External device connection with optional ACC cable

IP Radios – WLAN

Simultaneous TalkListen™ that Works over Wireless LAN

Communication System Using Wireless LAN

By deploying access points across an existing IP network, the WLAN radio system allows you to communicate from anywhere within coverage range. The IP110H can access the nearest access point, and roam between them.

Simultaneous TalkListen™

The Simultaneous TalkListen™ provides full-duplex one-to-many communication which users can talk and receive at the same time like a telephone style conversation.

Individual, Group,

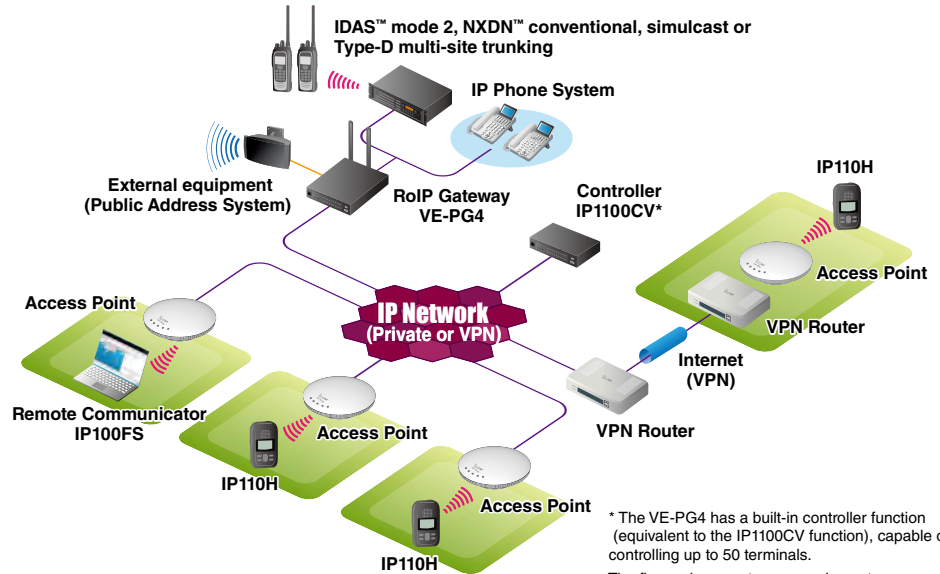

All or Area Communication

Staff spread across multiple rooms can communicate simultaneously. The IP110H can send and receive short data messages with a vibration alert from another unit*.

* Send preprogrammed message from the IP110H. Free texting from a IP100FS.

Interconnect between IDAS™ and IP Phone Systems

With the VE-PG4 RoIP gateway, the WLAN radio system can interconnect with an IP phone system, analogue radio and IDAS™ conventional, simulcast and Type-D multi-site trunking system.

* The VE-PG4 has a built-in controller function (equivalent to the IP1100CV function), capable of controlling up to 50 terminals. The figures leave out some equipment, such as a network switch, to simplify the information.

IP110H

Compact Wireless LAN Radio with Simultaneous TalkListen™

- Licence-free wireless LAN radio using IEEE 802.11 a/b/g/n/ac standards (2.4 GHz and 5 GHz)*
- WPA2/WPA Enterprise as well as Personal security • IP67/IP54 • 1000 mW loud audio
- Voice recorder function • Vibration alert function • Motion/Stationary Detection, Man Down and Lone Worker functions for emergency call • Text message • Status messages • 20 hours battery life • USB Type-C™ charging • Provisioning/FOTA (Firmware Over-the-Air)

* Authorized frequency range and channels may differ depending on the country.

IP100FS

Remote Communicator

- Send and receive voice, status and text message calls with WLAN radios
- Obtain location information of each radio based on connecting access point
- Can be installed on a Windows™ PC

IP1100CV

WLAN Transceiver Controller

- Capable of controlling up to 300 units WLAN radios (including IP100FS)
- 2.5 Gbps WAN Port and VPN Router Function
- Up to 500 call addresses for individual and group calls.
- Call recording function can record communication audio to an external USB flash drive

* The VE-PG4 has a built-in controller function capable of controlling up to 50 units.

RoIP Gateway

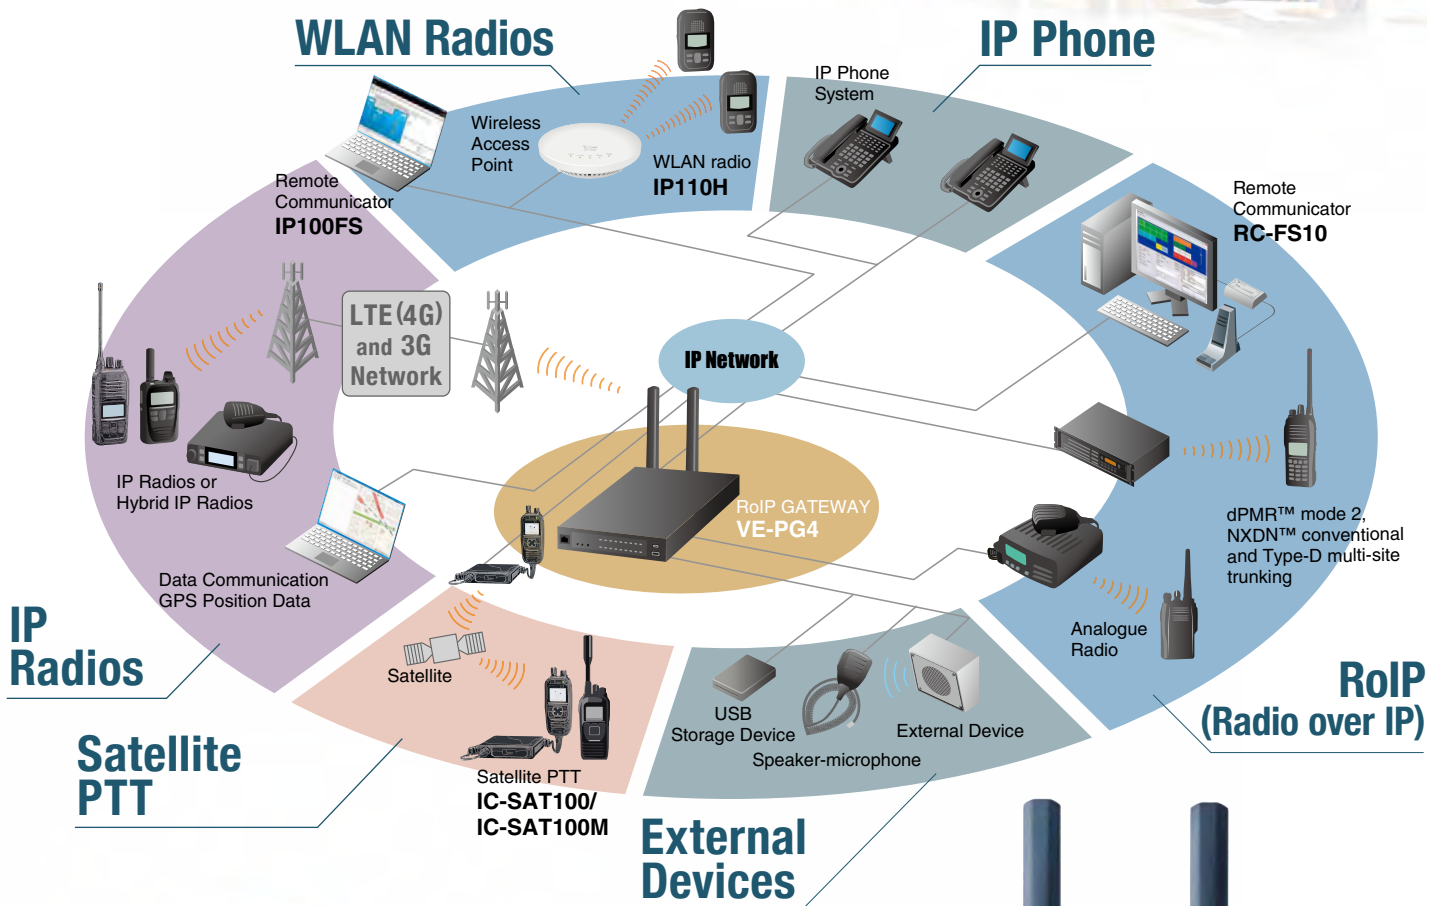

Bridging Communication Gaps, This Radio over Gateway Device Links Diverse Voice Communication Systems and Frequencies

The VE-PG4 is a versatile RoIP (Radio over IP network) gateway unit, which seamlessly interconnects various communication systems. The built-in LTE module* provides virtually nationwide communication coverage.

* Service availability depends on the country. Network coverage provided by a custom SIM card.

Communication Links

VE-PG4

Licence-Free Radios for Professional Use

IC-F29SDR Digital/Analogue

Multifunctional Professional Radio, Talk, Listen and See Messages

- dPMR 446 (Digital) and PMR 446 (Analogue) in one radio
- Digital 32 channels, Analogue 16 channels
- Display and 4 programmable keys on the front
- Status message
- CTCSS, DTCS for analogue
- IP67
- 1500 mW loud audio
- Alert-Ring function for emergency situations
- 26 hours battery life (with BP-280)
- Channel announcement
- 11 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

IC-F29DR3 Digital/Analogue

Digital Licence-Free Radio with Professional Durability

- dPMR 446 (Digital) and PMR 446 (Analogue) in one radio
- Digital 32 channels, Analogue 16 channels
- IP67 Waterproof and Dust-tight
- Class Leading 1500 mW Powerful Audio Output
- 26 hours battery life (with BP-280)
- Lone Worker Function
- AquaQuake™
- 11 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

IC-F29SR2 Analogue

Reliable High-Grade Radio for Demanding Workplaces

- PMR 446 (Analogue 16 channels)
- CTCSS, DTCS
- Built-in voice scrambler for private conversation
- IP67
- 33 hours battery life (with BP-280)
- 1500 mW loud audio
- Channel announcement
- 8 km coverage*

* Wide open space. Communication range will vary, depending on the terrain and conditions.

IC-U20SR Analogue

Professional Radio for Restaurants and Retail Shops Enhances Hospitality

- PMR 446 (Analogue 16 channels)
- Compact and lightweight
- IP54 / MIL810G
- 21 hours operation with BP-304A
- USB Type-C™ charging
- 600 mW loud and clear audio
- Emergency call button on the top of the panel
- Smart-ring function to check communication range
- Alert-ring function for emergency situation
- VOX function for hands-free operation

*1 Upgrade licence (ISL-CHEX) required to enable 4000 channel capacity.

*2 NXDN™ only

*3 With standard battery pack

*4 IDAS™ : Conventional mode, 5:5:90 duty cycle, power save ON

LTE : Depending on the condition of LTE signal strength

*5 Inversion type voice scrambler is not compatible with UT-109R/UT-110R voice scrambler.

*6 PTT ID and emergency call

*7 PTT ID only

*8 The non-display model beeps and its LED indicator blinks when receiving a message.

*9 RX only

*10 Default factory setting (Protocol) differs, depending on the radio model.

*11 Depending on versions

*12 UX-241 antenna is required.

*13 D-SUB. Digital modulation input is not available even when using accessory cables.

*14 CS-OTPM1 OTAP Manager Software is separately required to send the OTAP data to the transceivers.

*15 PTT ID, emergency call, radio check (RX), and stun/revive (RX).

All stated specifications and features are subject to change without notice or obligation.
